

Digger's Back Yard

Where Digger Dog makes safe digging fun!

Presented by your friends at: **GEORGIA811**
Contact 811 before you dig.

Meet and Color Digger Dog

My name is Digger Dog. I'm an expert on safe digging. I want you to join my team. So study all the safety tips in this book.

Digger's Decoder:

Know Your Lines
Your house is connected to wires and pipes that run underground. These are called utility lines. Can you spell them out using Digger's Decoder?

Know Your Flags

Sometimes, flags are placed in your yard to mark the utility lines so workers and parents can dig safely. Each utility line is marked with a different color. Color the flags, then use your crayon to follow the utility line over and under other lines to reach its utility.

Never Move The Flags!

Flags help the construction workers dig safely.

Welcome to Digger's Back Yard

Help him find the words buried below that are important to safe digging.

- CALL
- CONTACT
- WATER
- GAS
- SAFE
- ELECTRICITY
- CABLE
- LINE
- FLAG
- UNDERGROUND
- PHONE

Your Nose Knows

Gas leaks can be dangerous. When you smell gas, take the advice of my friend, Skunk Sniffy. Use Digger's Decoder to create Sniffy's important message.

(Get away and tell an adult.)

Brighten Skunk Sniffy's Day
Remember his message and fill in the colors below.

- 0 - white
- 1 - blue
- 2 - darker blue
- 3 - light brown
- 4 - darker brown
- 5 - yellow

Visit Skunk Sniffy at www.safegas.org/

We've talked about things underground. Now look up. Overhead electrical lines can shock and hurt people. Using Digger's Decoder, figure out what this guy, Ben Zapped, is doing wrong.

Know What's Up

Don't fly

or raise long objects like fishing

near overhead lines.

To learn more about Ben Zapped visit www.guacc.com/

Be careful around overhead lines. Keep away from them.

And if you ever see overhead lines that are touching the ground,
